TAKE A FEW MINUTES TO LOOK OVER THE BIGGEST-VALUE LINE OF TIRES THAT EVER ROLLED A HIGHWAY

LIKE anti-knock gas in your cylinders, is a set of our Goodyears on your wheels. Yes sir! They travel. And travel. And travel.

Why? Because they're made with Supertwist cord. And, because Goodyear leads in tread development.

Of course you know that prices are far lower this season. That's why it's poor business to try to squeeze the last mile out of those old tires.

Decide to see our Goodyears now. Three price ranges. Pathfinders. All-Weathers. Heavy Duty.

"Show What You Grow and Share What You Know"

Calgary Man Wins \$500 Prize for Best Slogan in Popular Contest

"Show What You Grow and Share What You Know," is the slogan which has been officially adopted by the World's Grain Exhibition and Conference to be held at Regina in 1932.

A short time ago the organization announced a slogan contest offering \$500 for the best word phrase which would typify the objects of the World's Grain Exhibition and Conference.

Over 7,000 entries were received representing approximately 18,000 slogans. They came from almost every part of the world and after careful consideration the board of judges recommended "Show What You Grow and Share What You Know," submitted by A. P. Straton of Calgary, Alberta. Mr. Straton is an Englishman by birth and has lived in western Canada for a number of years. At one time he was associated with the Saskatchewan Co-operative Elevator Co. at Regina. He is now connected with the Alberta Pacific Grain Company. The board of judges consisted of Hon. J. T. M. Anderson, Premier of Saskatchewan, Hon. J. T. Brown, Chief Justice of the Court of King's Bench of Saskatchewan and Dr. Walter C. Murray, President of the University of Saskatchewan.

M. D. of Cereal

The council of the municipal district of Cereal No. 212, met in Oyen on Saturday, May 9, at 10 o'clock a.m. Members all present.

The financial statements were approved as read and accounts were passed for payment.

Grants to Oyen and Cereal school funds were authorized.

The fence across the road allowance between sections 5 and 6 and 7 and 8, in township 28, Range 4, was ordered to be removed.

The reserve prices for the lands to be offered for sale by public auction under the Tax Recovery Act 1929, were set.

The secretary was instructed to take leases or assignment of leases on certain parcels of land to protect the municipal district for arrears of taxes.

The application of Miss Sarah Beamer for a pension under the Old Age Pension Act, was approved.

The secretary was instructed in regard to the road diversion on the west-half of 16-24-6, 4.

Authorization for payment for road allowance at the south half of 25-27-5, 4, was given.

The recommendations made by councillors for public works expenditures, were approved.

The reeve and secretary were authorized to borrow the sum of \$200.00.

Council adjourned to meet Saturday, June 13, at 10.00 a.m.

Board of Trade

Meet Thursday

The board of trade will meet in the Alberta Hotel dining room tomorrow evening at 8 o'clock. Among other matters for discussion will be the July 1 sports and work on a swimming pool south of town.

LEGAL NOTICE

Tax Sale Notice

Municipal District of Berawan No. 271

NOTICE IS HEREBY GIVEN that under the provisions of the Tax Recovery Act, 1929, the Municipal District of Berawan No. 271, will offer for sale by public auction, at the offices of the secretary-treasurer, at Sibbald, Alberta, on Saturday, the 16th day of May, 1931, the following lands:

Part	Sec.	Twp.	Rge.	M.
NW	9	27	1	4
NE	25	27	1	4

Taking Canada's Census

The decennial task of "counting noses" in Canada, or, in other words, the enumeration of the census of the Canadian people, takes place in the month of June. It is a big and fairly expensive job requiring the service of a small army of men, and, after their initial work is completed, hundreds of clerks and expert statisticians will be engaged for months compiling, tabulating and analyzing the returns sent in to Ottawa by these thousands of enumerators.

The question may naturally arise in the minds of some people: Is it all worth while? Is such a large expense justified, especially in these times of declining revenues and enforced economy, merely to ascertain how many people there are in Canada, and an array of facts relative to their individuality? There can be only one answer to this question. It is very much worth while, in fact, it is vital importance. Just as a farmer has to ascertain how many pounds of milk and cream his cows have produced; or to a business man how great his annual turnover has been, so is the collection of the census information of importance and value to the nation as a whole. It is a form of national stocktaking.

But that is not all. Under our Canadian system of government, and the relationships, financial and otherwise, which exist between the Federal and Provincial governments, population is an important factor. In many respects it is the all-important, the deciding factor.

First and foremost, the representation of the people in Parliament is based on population. Let us illustrate: Suppose, for example, the census shows a population of 3,000,000 people in the Province of Quebec. Under the constitution these 3,000,000 people are entitled to 45 seats in the House of Commons, that is, one member for each 66,666 people. Therefore each group of 66,666 people in every other Province is entitled to a member. After each decennial census there is a redistribution of representation in the House of Commons based on the facts disclosed by the census. In this way the representation of all parts of the Dominion is made and kept uniform and equitable.

Furthermore, the financial relations between the Dominion and the Provinces is based on population. The Dominion pays cash grants to the Provinces of so much per head of population, and in the case of the three prairie provinces it pays increasing amounts annually as population increases until a certain maximum amount is reached. Unless there was a census, taking these amounts could not be accurately ascertained.

Again, only by knowing the population it is possible to arrive at such facts as the amount of the per capita debt, per capita taxation, volume of trade and commerce per capita, and a volume of other statistical matter upon which both national and Provincial policies of finance and taxation are founded.

While the enumerators are thus "counting noses" they are also gathering other important information. The wealth of the Dominion, its productive capacity, the social conditions of its people, the racial antecedents, the extent of their literacy, how many males and how many females, how many children, middle-aged, and aged people,—information all having a bearing on future policies for the development and well-being of the Canadian nation.

This year, for the first time, complete information is to be obtained on the subject of unemployment,—how many are out of work, the nature of their usual employment, what causes their state of unemployment, etc., etc.—all with a view to finding out the actual extent and causes of unemployment as a guide to finding out and applying the necessary remedies, and developing policies to prevent a recurrence of such an unsatisfactory and deplorable condition.

It will be seen, therefore, that the census-taking is a vitally important national undertaking. It is clearly the duty of every citizen to co-operate with and assist the census enumerator in his work. His questions should not be resented, but, on the contrary, should be welcomed and full information freely and gladly given to him. He will be discharging his duty, a national duty at the same time, in the manner in which he is discharging a national duty by extending every assistance in his power.

Nurse Leaves For Northland

Winnipeg Lady Will Remain In Far North For Five Years
 Miss Prudence Holcomb, of Winnipeg, formerly of Oak Lake, Manitoba, leaves shortly for Baffin Bay as superintendent of a new Anglican hospital at Pangnirtung. She will make the trip to the far north by the Hudson Bay boat leaving Montreal early in the summer, the only ship of the year to attempt the census enumeration in the north. Her duties will take two months to complete the trip to Pangnirtung, and Miss Holcomb has undertaken to remain in the mission hospital there for five years.

The radio has put the mission headquarters in touch with the outside world to the extent that radiograms are received there once a week. But none can be sent out. The population consists of 12 white people and shifting population of Eskimos.

Nothing worries some people like the absence of worry in others.

Easy Work For Blind

Profession Of Masseur Is Very Popular Among Sightless In Japan
 The profession of the masseur is the one in which a blind person is equal, if not superior, to persons with sight. W. McE. Edgar, Secretary-General of the National Institute for the Blind, with offices in London, said at the world conference in London, "I am surprised that in America the profession of masseur has not been more popular among the blind." Edgar said: "In Japan almost all of the masseurs are blind. In fact, it has become so much a custom that the Japanese words for 'blind man' and 'masseur' are the same."

A new automobile has been consigned to London, England, for a Maharajah of Patiala, the glass enclosure of which enables the owner to see out, but prevents outsiders seeing in.

Heart and Nerves So Bad Was Unable To Sleep For Hours

Miss Theresa M. Ravary, Gallatin, Ont., writes:—"I was troubled, for almost a year, with my heart and nerves, especially at night when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could enjoy a good night's rest, and rapidly regained my former state of health."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The Milburn Co. Ltd., Toronto, Ont.

Soviets Could Mobilize Large Army Quickly

Despite protests from the Soviet that the Russians are working for peace it is estimated that the nation could mobilize an army of 17,000,000 men within three months of the outbreak of war. Of these, some 10,000,000 would be members of line regiments and provide a rifle strength of that number.

Within three weeks of the start the Soviet is believed capable of throwing 3,000,000 fighting men into action. In addition, the national leaders have been concentrating on supplies, and they keep permanently in reserve enough coal to last three months. They are also building up the air wing of the fighting corps. Besides tossing bombs and shells on the world markets, the Soviet is evidently ready to throw in quite a supply of cannon fodder when the time comes.

MOURNING WARDROBE

"A death occurred in our family and I had to go in mourning. I could hardly afford to buy all black clothes, so decided to do my own thing. I consulted our druggist and he advised me to buy Milburn's Diamond Dyes. Everything came out beautifully. I wore dresses, stockings and shoes, and I was able to appreciate the excellence of the black Diamond Dyes. I tried several other brands and the results were impossible. I had to buy a new wardrobe. I was tired and over. Recently I was invited to wear a beautiful raspberry shade and I dyed a rug a nice raspberry shade. The results were fine. They are real money savers. I find they really can buy—I truly believe."

Mrs. G. K. L. Montreal.

Viny Memorial

Major Newburn Will Endeavour To Hasten Completion Of Work
 Maj.-General S. C. Newburn, of Hamilton, Ont., who sailed for Europe on the "Empress of France," will endeavour to hasten completion of the Viny memorial while overseas, he said. Before the boat left, the officer, in referring to the memorial said:

"As chairman of the national battlefields commission, I am going to meet General Hughes, who is now in Europe, and one of the things I will do is to try and expedite the completion of the Viny memorial. This memorial was supposed to be finished next year, but I understand there has been some delay in receiving the stone and while I can say nothing officially, it is possible that the completion of the memorial will be somewhat later than expected."

Worms are encouraged by morbid conditions of the stomach and bowels, and so submit. Milburn's Worm Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine which is not only a powerful destroyer, but a health-giving medicine most beneficial to the young constitution.

Largest Fur Shipment

The largest single shipment of white fox pelts ever received in Winnipeg, Canada, has just been received by the Canadian National Express. The shipment was transported from the shores of the Arctic Ocean by the Hudson Bay Railway. The shipment, which was shipped independently of the large fur companies included 451 white fox pelts and a dozen red fox pelts, all of which were trapped in the high north during the past winter.

Nights Of Awey come in the train of illness. The victim cannot lie down and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. D. Kellogg's Anasemia Remedy. It banishes the "frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist."

Record For Apple

Apples of any variety that cannot stay a week off the branch without rotting ought to be blamable. The record of a clove apple in the possession of Mrs. Charles is notable. Worcester, Mass. Placed in a Bridgewater 62 years ago and preserved, it is in as good a condition as if just taken from a tree.

Milburn Low Grade Wheat

The Edmonton Chamber of Commerce has appointed a committee to prepare a report in connection with the development of an Eastern market for low grade Alberta wheat and coarse grain. The object will be to sell to Ontario and Quebec supplies of low grade grains for feeding purposes.

Denmark has only 179 miles of air service routes.

How Women Lose Fat In England

How would you like to lose unbecomingly fat that you don't need and don't want, and at the same time feel better than you have for years? How would you like to lose your abdominal fat, and at the same time make your skin as clean and clear that it will cost admiration? How would you like to get your weight down to normal, and at the same time develop that urge for activity that makes you a pleasure and also gains in ambition and keenness of mind?

Get on the scales to-day and see how much you weigh—then get a bottle of Knudsen Salts. Take one-half teaspoonful every morning in a glass of hot water, and when you have finished the first bottle weigh yourself again.

Now you will know the pleasant way to lose unhealthily fat, and you'll know that the six vitalizing salts of Knudsen have presented you with glorious health. That's the way Englishwomen keep slim—and you!

Does Not Include Churchill

British Engineer Will Not Survey Hudson Bay Port

The Port of Churchill will not be included in the survey to be conducted by Sir Alexander Gibb, noted British harbor engineer, Premier Bennett has announced in the House of Commons.

The Hudson Bay port was designed from recent plans, and the premier did not believe Sir Alexander Gibb, noted British harbor engineer, Premier Bennett has announced in the House of Commons.

Three of Sir Alexander Gibb's men are now in Ottawa, preparing preliminary data for his personal, the premier said, but he did not announce when the engineer, himself, would leave England. The survey will be confined to Halifax, Saint John, Quebec, Montreal and Vancouver.

Recipes For This Week

(By Betty Barclay)

CORN RELISH SALAD

- 1 package lemon-flavored gelatine.
- 1 cup boiling water.
- 1 cup cold water.
- 3 tablespoons vinegar.
- 1 teaspoon salt.
- 1/2 cups corn, cooked.
- 2 green pepper, chopped.
- 1/2 cup onion, chopped.
- 1 tablespoon onion, grated.
- Dissolve gelatine in boiling water.
- Add cold water, vinegar, and salt.
- Chill. When slightly thickened, fold in corn, pepper, pimiento, and onion.
- Pure into mold. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 8.

COCONUT CREAM PIE

- 1/2 cup special cake flour, sifted.
- 1/2 cup sugar.
- 1/2 teaspoon salt.
- 2 cups milk, scalded.
- 2 egg yolks, well beaten.
- 1 cup coconut, southern style.
- 1 teaspoon vanilla.
- 1 baked 9-inch pie shell.
- 4 tablespoons sugar.
- 2 egg whites, stiffly beaten.
- 1/2 teaspoon vanilla.

Combine flour, sugar, and salt; add milk. Cook in double boiler until thickened, stirring constantly. Pour small amount of mixture over egg yolks, stirring vigorously. Return to double boiler and cook 10 minutes longer. Add coconut and vanilla. Cool and pour into pie shell. Fold sugar into egg whites; add vanilla. Pipe lightly on coconut filling. Bake in slow oven (300 degrees Fahrenheit) 12 minutes, or until delicate brown.

Mothers Value This Oil.—Mothers who know how suddenly their children lose their health and how necessary it is in applying relief, always keep at hand a supply of Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of all ailments. And they are wise, for its various uses render it a valuable medicine.

Government Advertising Campaign

Large Sum Spent In Urging People To Buy Canadian-Made Goods
 Total of \$92,020.77 was spent by the Dominion Government in the advertisement of the Department of Trade and Commerce which urged the people of Canada to buy Canadian-made goods. This sum had been spent since the present administration assumed office, according to a return tabled in the House of Commons.

The money was distributed among the newspapers of the country as follows: Dailies, \$38,023.49; farm papers, \$36,417.46; miscellaneous, \$13,976.98; and weeklies \$2,602.84.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Extirminator.

Study Economic Conditions

Urges Appointment Of A Permanent National Committee For This Purpose

Appointment of a permanent national committee to study all phases of social and economic conditions with a view of making plans to prevent recurring cycles of unemployment is urged on the Dominion government by a round-table conference on unemployment which met in Ottawa. The conference, convened by the Canadian Council of Child Welfare, was representative of social welfare organizations in all parts of Canada.

The recommendation was one of many contained in a report which was drawn up and presented to Hon. G. D. Robertson, minister of labor, for submission to the Dominion government. Senator Robertson attended a dinner which brought the conference to a close. The report will be submitted to the provincial governments.

The proposed committee, it is suggested, would study the economic and social structure of Canada "with the purpose of pooling the best knowledge of governments, industrial, agricultural, and financial interests, social and health agencies, in order to make a more stabilized system of production and distribution and of supply and demand."

Use Machine Guns

Toronto Police Force Being Trained To Handle Deadly Weapons

Detectives of the Toronto police department are being trained to handle machine guns if the occasion ever arises to use these deadly weapons, the Toronto Star says. Three guns that fire 1,000 rounds in a minute and bullets that travel 930 feet a second, are being experimented with by Inspector Robert Alexander, aide to Mayor Duggan, and officer in charge of training.

Officers of the motorcycle squad, the Star further says, are also taking part in the training which will be extended to other ranks after all detectives are thoroughly schooled.

Douglas's Egyptian Liniment should be in every household. Stops bleeding, soothes, and prevents inflammation and prevents blood poisoning. Keeps blood in circulation and prevents inflammation and prevents blood poisoning.

The Bible contains two chapters, which are needed alike, sword and word. They are the thirteenth chapter of II Kings, and the thirty-seventh chapter of Isaiah.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-Sani keeps them from staling. Cut Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

Appleford Paper Products

HAMILTON, ONT.

Western Representatives:
 HUNTER-MARTIN & CO., REGINA, SASK.

HON. ROBT. WEIR REFERS TO CREDIT PLAN FOR WEST

Ottawa, Ont.—In a speech recording government achievements for agriculture since he took over that portfolio, Hon. Robert Weir, Minister of Agriculture, around the wild enthusiasm of Conservative supporters in the House of Commons, it was the minister's long-awaited maiden speech.

For weeks opposition members have been demanding that the government declare its agricultural policy. Finally, through the medium of an amendment to supply asserting the government failure to announce an agricultural policy, the opposition brought the demand to a head. Mr. Weir, Minister of Agriculture, spoke in crowded galleries and chamber, to Conservative benches which cheered him again and again, and to an opposition which protested at times the statements which he made.

The minister indicated what had been done since he assumed office rather than what he proposed to do. He told of steps taken to develop the British market for Canadian cattle; of negotiations with the United States and cattle men, and of a fair measure of success resulting therefrom.

He discussed the butter market, claiming that through the efforts of the government prices for the Canadian product had been kept up until a few weeks ago, when the market broke. The eight-cent duty on importations under the British preference and verbal agreements with Australia and New Zealand had helped to hold the market, he claimed. The negotiations carried on so as to enable western farmers to obtain banking credit, were described. These had culminated in an offer of assistance to the Dominion Government. Mr. Weir asserted, "When the offer is known," he said, "I am sure honorable gentlemen opposite will blush for having discussed this question in the way I have done."

He realized, said Mr. Weir, that the policies which he had announced would not bring immediate relief to the farmer. He knew the load of mortgages and debt that the western farmer was carrying. He knew that it required immediate relief, but that loan was not put on the farmer's back last August, he said. He knew that the minister directed some searching shots across the bow of the opposition, particularly aimed at Hon. W. R. Meagher, his predecessor in office, and R. H. Mackenzie King.

After the debt-slumping, charging and cheering had subsided when Mr. Weir sat down, it was met by an outburst from opposition benches as John Valance, Liberal member for South Battleford, rose to reply.

"After listening to the speech of the minister, I am convinced that he is a better politician than he is an agriculturist," he said. "The most important matter for the western farmer today is markets for wheat and the minister never touched on it."

Establishment of a 100 per cent wheat pool, or the restoration of the Wheat Board was urged by Mr. Valance.

In earlier debate, Dr. T. F. Donnelly, Liberal member for Willow Bunch, had criticized strongly the activities of Hon. G. Howard Ferguson, Canadian high commissioner to London, England, in connection with the Home wheat conference.

Mr. Ferguson, he alleged, had succeeded in dividing buyers and sellers.

Probe Mail Thefts

Series of International Mail Robberies To Be Investigated

New York—Postal authorities both here and in Great Britain began an investigation of a series of international mail robberies, the extent of which officials have not yet been able to determine.

A systematic rifling of letters, some containing remittances to persons in Ulster, Ireland, had been going on some time, it was learned recently. United States and British postal authorities have been pushing their investigation, co-operating by cable.

It is believed the mail has been robbed on the United States side and after reaching England and Ireland.

Boy Bandit Escapes Lashes
Ottawa, Ont.—The 20 lashes to which Robert Kitowski, a Fort Frances boy slightly over 16 years of age, was sentenced have been remitted by order-in-council signed by the Governor-General, Kitowski, who robbed a bank, was sentenced to 20 lashes, remitted to five years and 20 lashes.

W. N. U. 1889

Experts Will Attend Wheat Conference

Discussion At Canada House, London, England, Will Be Private

London, England.—All the wheat exporting nations of the world, including Soviet Russia, will be represented at the wheat conference opening on May 18, at Canada House here, under the chairmanship of Hon. G. Howard Ferguson, Canadian high commissioner to Great Britain.

The United States has already indicated it is sending three long Russian participation is assured. And the conference, an outgrowth of the world wheat conference at Rome, will be enabled to make a thorough study of the world wheat situation so far as it particularly concerns the exporting nations, preliminary to endeavoring to reach agreement on some form of orderly marketing of the next wheat crops.

The conference is expected to last about a week and the discussions will be private. The Canadian high commissioner—Hon. G. Howard Ferguson—will represent this Dominion at the wheat conference to be convened in London, England, on May 18. The advisers who were present with Mr. Ferguson at the wheat conference at Rome will also act in the same capacity at the London wheat conference.

Installed In Office

Alberta's Lieutenant-Governor Sworn In At Impressive Ceremony

Edmonton, Alberta.—On May 5, Hon. W. L. Walsh, former supreme court justice, was sworn in as Alberta's fourth lieutenant-governor since its creation in 1905. Successor to Hon. William Robert Bennett, he took office at the legislative building here in an impressive and brilliant ceremony attended by the vice-regal retinue, Alberta's judiciary and members of the legislature. Hon. Mr. Walsh took the oath of office administered by Hon. H. H. Horne, chief justice of the supreme court of Alberta.

A colorful gathering attended the swearing-in ceremony. Col. A. C. Gillespie, aide-de-camp, met the vice-regal train at Milnet, and accompanied the new lieutenant-governor to the Government House in Edmonton. Civic officials, as well as provincial government officials, were present. Hon. J. H. McCreary, minister of agriculture, greeted the first citizen of Alberta and Edmonton on his arrival here.

B.C. Cattle For Russia

Negotiations Opened Up For Purchase Of Pure Bred Stock

Vancouver, B.C.—It is understood that Soviet Russia may buy a number of purebred dairy cattle from British Columbia farmers to strengthen the herds of that country. The negotiations were opened some months ago, and steps are now being taken to arrange the best means of handling them. They are to go from here to Japan, and will be transhipped from there either to Harbin or Vladivostok. It is understood that the first shipment will consist of 40 head.

Another movement of dairy stock from this province is to be shipped to Japan, and it is becoming a regular one. A dairy farm at Shanghai is taking about 10 head of good grade milkers monthly, and it is expected this will continue. It is in the nature of replacement, as mortality in the dairy herds at Shanghai is fairly heavy.

Alberta Wheat Pool

Will Carry Out Its Usual Policies Says Henry Wood

Calgary, Alberta.—The Alberta Wheat Pool will carry out its usual policies and members will be bound by contracts which they have signed, said Henry Wood, chairman of the Alberta Pool, when informed that the Manitoba Wheat Pool will solicit the signatures of members as to whether they wish the privilege of selling their grain on the open market after June 1, through the Pool elevator system.

"Action by the Manitoba Pool has nothing whatever to do with our pool, and might as well be taken to the moon," he said. "We intend to carry on in the future as we have done in the past," Mr. Wood declared.

Heavy Fire Loss Last Year

Toronto, Ont.—Canada's property loss by fire in 1930 was more than \$46,000,000 according to figures supplied by the Dominion Fire Protection Association which held its annual meeting here on May 8. Number of lives lost during the year was 233.

Reduced Wheat Acreage

Chubasco, Australia.—Approximately 12,500,000 acres of land will be sown to wheat in Australia in the coming season, compared with 13,100,000 acres last year, the government states.

Busy Times Ahead

Prophecy Is Made That Canada Will Soon Need Immigrants To Meet Demand For Workers

Toronto, Ont.—Prophecy that Canada would be needing immigrants to meet the demand for workers within two years was made by C. L. Smythe, director of the Technical Service Council, at the 10th annual convention here at the Ontario office superintended by the Employment Service of Canada.

It was urged that a clause requiring that 75 per cent of the help needed in construction of public works be secured through the Employment Service of Canada, should be included in government contracts. The Federal Government will be approached to ensure the inclusion of a clause to this effect.

It was resolved to request the department of labor to take additional means to discourage immigration requests and that the immigration department be asked to check carefully all skilled workers seeking admittance to Canada.

Letters Seized

Tickets Seized At Winnipeg Post Office

Winnipeg, Man.—Thousands of letters were seized at the Winnipeg post office where they were found to contain Irish seditious letters on the English Derby. The seizure was made under orders of the post-master-general of Canada, as seditious mail is illegal under Section 236 of the Criminal Code.

The postal staff here have seized numerous letters containing seditious letters in the past week, but recent collection was the largest on record. The letters, "disguised in various ways," will be returned to the dead letter office, Ottawa.

WOULD EXTEND BRITISH TRADE WITH DOMINION

Ottawa, Ont.—"We are fully assured that there is a strong pro-British sentiment in Canada and that the manufacturers here are willing to co-operate with English industrialists along lines that are elementary and supplementary," Sir James Lithgow, president of the Federation of British Industries, said in an interview here. "We are fully conscious that there is over-production in the empire and throughout the world, for the relief of which British industrialists are willing to do their part, and we believe that there are openings and directions in which it is to Canada's advantage to present it to British industry."

Sir James is leading a trade delegation which has come to Canada upon the invitation of Hon. H. H. Bennett, minister of trade and commerce, to study economic conditions and to discuss with the government and manufacturers of the Dominion ways and means of extending British trade in Canada. The other members of the delegation are Sir Arthur Colclough, president of the Canadian Manufacturers' Association, and Mr. J. H. McCreary, minister of agriculture. They were interviewed by Mr. Stevens, but no statement was given out regarding the conference.

HAPPY SCENES IN MADRID

EXILED TO SIBERIA

Mine Vera Flegner, famous Russian woman leader, who, at the age of 75, has been exiled to Siberia for her protests of fogging by Soviet of 40 women members of Socialist party, is shown in this photograph. She was repeatedly fogged and imprisoned for her attitude toward existing order of things.

Senate Craves Work

Lack Of Legislation Given As Reason For Slack Hours

Ottawa, Ont.—Restless because of inactivity, the Senate is searching for work. Since the present session opened, the Upper House has deliberated on 10 hours altogether, because of lack of legislation originating in the House of Commons. Today, the Senate had an informal discussion on the aims and achievements of the League of Nations.

Rising at the conclusion of the informal debate, Senator John Lewis pointed to the lack of legislation to be considered by the Senate at the present time. It was very empty, he said, but he could see no reason why speed and direction of public thought could not be influenced also by the Senate.

Leads In Wheat Production

States That Russia Is World's Leading Producer Of Wheat

Washington, D.C.—Russia again is the world's leading producer of wheat, figures supporting that statement were reported by the United States Department of Agriculture.

It was said that Russian production for 1930 likely would be announced at 1,097,000,000 bushels, which is 246,000,000 bushels more than was produced by the United States—largest wheat producer in the world.

Sir James is leading a trade delegation which has come to Canada upon the invitation of Hon. H. H. Bennett, minister of trade and commerce, to study economic conditions and to discuss with the government and manufacturers of the Dominion ways and means of extending British trade in Canada. The other members of the delegation are Sir Arthur Colclough, president of the Canadian Manufacturers' Association, and Mr. J. H. McCreary, minister of agriculture. They were interviewed by Mr. Stevens, but no statement was given out regarding the conference.

HAPPY SCENES IN MADRID

Madrid, Spain.—A joyous holiday was being celebrated in Madrid, Spain, on the occasion of the birthday of the king, Alfonso XIII.

One of dramatic scenes typical of celebrations that marked the fall of the Spanish republic can be seen in this photograph. Riding on the shoulders of their colleagues in Madrid, these republicans are waving the Spanish republic flag.

Eckener Will Meet Wilkins In Arctic

Announces Plan To Start For North Pole In July

Friedrichshafen, Germany.—Dr. Hugo Eckener, master of the Graf Zeppelin, announces he will start for the North Pole in his big ship about the middle of July to meet Sir Hubert Wilkins, who is going up there in a rubber boat.

This attempt to make a contact with Sir Hubert at or near the pole, he said, should clarify the question as to whether the airship is the most appropriate means for landing polar expeditions near their destination, picking them up later and providing them with supplies during their stay in the Arctic.

The Graf will carry 45 persons on the Arctic flight, including Lady Drummond Hay. It will take along complete polar equipment, including sleds, boats and Arctic clothing. The time of the start will depend on the progress of the Wilkins expedition.

Ottawa Dismissals

Information Given Out Regarding Retirements Of Employees

Ottawa, Ont.—Of the 1,205 employees of the Department of the Interior, who have been retired on account of retirement, 442 are permanent on the staff at Ottawa, and 126 temporary. In the outside service 101 were permanent and 136 temporary employees. This information was given to E. R. E. Chevier, (Liberal, Ottawa), in the House of Commons, in answer to a question by Mr. Murphy, Minister of the Interior, in answer to a question.

The Dominion lands administration service loses the largest number of personnel, with 442 employees being retired, or notified of retirement. Of the 442, 126 are permanent, and 316 will be dismissed from the various bureaus.

MANITOBA POOL MAY ADOPT A NEW SYSTEM

Winnipeg, Man.—Manitoba Wheat Pool members will be given the right to choose between pooling their grain voluntarily, or selling it on the open market.

If the proposal announced recently by Manitoba Pool directors are approved by members, if the proposals are accepted, they will come into force June 1, 1931.

Contained in a letter signed by President Colin H. Burrell and forwarded to all Pool members, the proposals will be discussed at special meetings of 94 Pool locals in Manitoba, which will hold the last week in May. Under the suggested changes, all open-market sales would be handled by the Manitoba Pool Elevators, Ltd., the Pool's elevator system.

Decision to pave the way for alteration of the principle of the contract should members so desire, was reached at a meeting of the board of directors at Winnipeg, May April 10-12, at which consideration it followed a directors' meeting was given to a resolution passed at the annual Pool delegates meeting last November, asking directors to call a 1931 summer meeting to consider the question of handling the 1931 crop.

If members of the Manitoba Pool approve the proposals—and it is expected that adoption will be unanimous—the grain handled by Manitoba Pool Elevators, Limited, will be "hedged" immediately on the open market. "Hedging" is sale of grain on futures contract to guard against a price-drop. Decision to "hedge" grain would mark a change in Pool policy, which has on basic principle spurned the use of "hedging."

Mr. Burrell lists the directors proposals as follows:

1.—The pooling of grain to be placed on a purely voluntary basis.

2.—All grain not pooled to be sold through Manitoba Pool Elevators, Limited, on the open market.

3.—That the proposed changes be submitted to the 94 Pool locals at meetings which will be held in the last week of May, in order that every member may have an opportunity to become acquainted with them.

That the plan come into force on June 1, 1931.

Every Pool member is urged in the Burrell letter to attend his local meeting and give his personal support to this endeavor to carry co-operative marketing through a critical time.

WHEAT PRICES THE MAIN CAUSE OF DEPRESSION

Ottawa, Ont.—Reduction in salaries of civil servants may be necessary during the present depression, suggested Senator J. J. Hughes of Prince Edward Island, speaking in the senate. The reduction should be general and include the prime minister as well as the lowest-paid office boy. The president and employees of the nationally-owned railway also should be included.

Hon. W. A. Buchanan, Lethbridge, Alberta, said the one word indicative of Canadian conditions was "wheat." If wheat prices could be restored to normal rates, the solution of Canada's economic problems would be possible. The economic welfare of Canada depended upon the purchasing power of the Western farmers, and if steps were not taken to raise wheat power, conditions would become worse.

Irrigated lands in the West might be changed from wheat production to that of commodities not in competition with general agricultural production in the West, Senator Buchanan suggested. The sugar beet industry might be developed; canning factories might be built; and more given to the production of wool.

Unless new markets were found for Western crops, a depression would be closed permanently, Senator Buchanan predicted. The industry there was in as acute distress as in any other industry in the world. During the past year averaged two days' work a week.

It was suggested that a government bill to appoint two additional directors for the Canadian Railway.

Film Studios For Canada

British Firm May Enter The Production Field Here

New York—Possibility that the Gaumont-British Film Corporation, one of the largest motion picture organizations in Great Britain, might enter the Canadian film industry, was seen in the statement by Arthur Lee, of the American-Anglo Corporation, that preliminary negotiations were under way which might result in the establishment of a Gaumont-British studio at Windsor, Ont., and Victoria, B.C.

While these negotiations were in a very vague stage and might not come to anything, Mr. Lee said Gaumont-British this summer would make a determined effort to place more pictures in Canadian theatres. He said the western interest in the industry had been increased by the fact of securing increased distribution for Gaumont-British pictures.

Mr. Lee denied rumors that Gaumont-British entertained the idea of founding a theatre chain in Canada.

For Uniform Auto Laws

Inter-Provincial Convention To Be Held At Ottawa This Month

Ottawa, Ont.—A convention to consider uniform laws to be held at Ottawa, May 20 and 21, will delegates of the roads departments of the various provinces will meet to discuss ways and means to obtain uniform laws regulating traffic on the highways of Canada. It was announced by Hon. J. E. Perreault, Minister of Roads, at the local provincial office.

It was explained by the minister that, because of the inter-provincial traffic on the roads connecting the different parts of the country, it had become urgent to harmonize the regulations of automobile traffic.

Some of the laws adopted at Quebec had been evidently copied from other provinces, said Mr. Perreault, and it is hoped that when properly explained, they will be adopted by all.

Establishment Of New Tariff Board Asked

Notice Of Resolution From Premier Bennett Appears On Order Paper

Ottawa, Ont.—Notice of a resolution calling for the appointment of a new tariff board appears on the order paper of the House of Commons in the name of Rt. Hon. R. B. Bennett, prime minister and minister of finance. The motion reads as follows:

"Resolved that it is expedient to bring in a measure for the appointment of a tariff board, to prescribe the constitution, functions and duties of the board, and to provide for the salary to be paid the members, officers and employees of the board."

The resolution will form the basis for a bill to be introduced later.

State Medicine Bill Killed

Commons Rejects Measure For the
Nationalization of Medical
Service

By a vote of 70 to 41 the House of Commons rejected a resolution sponsored by Dr. J. P. Howden (Lib., St. Boniface), to the effect that "a measure of federal state medicine would be in the best interests of the Canadian people." The vote was practically a party division, the government members opposing the motion, with the opposition in favor. However, two Liberal members recorded themselves against it. Ont. Dr. F. W. Gowenlock, of Medicine Hat, Alberta, and the other, Dr. J. A. Denis, of St. Denis.

Closing the debate, the mover of the resolution stated that the medical profession had a monopoly in this country. Many doctors gave treatment to indigent persons, without thought of remuneration. He stressed the necessity for periodical health examinations. The medical profession at large was favourable to state medicine, its opponents representing only those doctors who did not want "but drew large fees."

He would not respond to the promptings that he should withdraw his motion, but was resolved to have a vote on it. If the resolution were withdrawn, it would merely be thrown into oblivion. By seeking a division he at least assured it of an honorable death.

How many members were prepared to support nationalization of medical services of Canada, how many were prepared to support the entire subordination of medical assistance, medical practitioners, and the entire situation of the state as employers of all medical services.

Had members considered the effect on provincial health organizations and others if a resolution in such terms was adopted? In England there was no "nationalization" of medical services. In no country in the world except one, had such a proposal been accepted, and the results in that country were quite uncertain.

That is an experiment in socialism carried on in no country but one—the prime minister declared. "Time has not permitted the result to be known, but surely we cannot declare we are going to engage on such a large experiment in socialism." The provinces and municipalities had their health services and the Dominion contributed generously by appropriation to health expenditure, and there was no item in this year's estimates for such purpose. Then again there was the constitutional legal angle to the question. Premier Bennett suggested that the discussion having taken place the resolution might well be withdrawn.

Dr. Howden, in moving the resolution, said serious epidemics frequently left breadwinners without money to go on, and in a very distressing condition. When sickness came to a home it not only caused worry, but also frequently was the source of serious financial difficulty.

A system of state medicine conducted by the Dominion Government was urged by Dr. Howden. "The wealth of the country," he said, was purchased by the labor of the people, and the wealth and prosperity of Canada depended on the health and strength of the people. Ill-health and disease were neither necessary nor inevitable. Children born of healthy parents in good conditions would normally be strong. But children born of weak parents in conditions of poverty and distress could not be strong.

"Canada was no country for weaklings," said Dr. Howden. "No honest person ever came here and managed to live without toil, and only those who were strong in body and courage could hope to succeed or become useful citizens."

Hong Kong, China, now has six table tennis.

"Why are you putting advertisements on upside down?"
"Nearly everybody goes in aeroplanes nowadays, and they see the placards as they come down."—Buen Humor, Madrid.

W. N. U. 1859

Reason Not Wholly Clear

But Tobacco-Fed Poul Are Healthier
and Bigger says Scientist

According to Howard W. Hulsebee, AP Science Editor, tobacco fed to baby chicks is making them into bigger and better broilers at the Pennsylvania State College. This same nicotine diet, in the fully-grown old fowl, makes healthier hens and roosters. What is more it may emancipate the farm-owners from having to keep them so closely watched for fear of a parasitic infection that chickens may pick up when economically foraging for their own food.

A high percentage of nicotine in tobacco is the secret of the effectiveness of the State's tobacco diet. The value of tobacco as a vermifugal agent in chicken feed has been recognized for years, but sometimes its use has yielded uncertain results. In certain cases, it is likely to make hens ill, some being more susceptible than others.

The reason for the greater growth of baby chicks is not wholly clear now it is necessarily ascribed to nicotine. If the cause is a vitamin, this is something new in feeding. Dr. Hulsebee says. Better health may come from the killing by nicotine of *ascaridia* *lincolni*, a commonly called round worm, a type of food parasite. Farmers have been forced to raise chickens on ground free from such organisms.

Like boys from their first smokes, the chicks can be made ill by too much tobacco at the start. Like the humans they also develop "tolerance to increased amounts."

However, there is one parallel between smoking and feeding tobacco to chickens. In smoking nicotine stimulates work through the blood and the nerves. In the chicken diet it is only a disinfectant passing through the body, not necessarily stimulating work through the blood and the nerves. In the chicken diet it does not affect the flavor of the meat or eggs.

Willing To Go Halves

New York Taxi Driver Shares Kindness Of Foreigners

A young lady on her way uptown in New York, by taxi on one of those rainy days, noticed during a traffic halt a frail old lady standing in the downpour just outside the cab window, dejectedly waiting for a street car. On a sudden impulse, she opened the door of the taxi and offered her lift on her way. She ended in fact by taking the woman to her home—some distance out of her own way—to be sure, but she decided that if she was going to be a Samaritan she'd be a good one. Arrived at last at her own address, she prepared to pay the fare, by this time a pretty sizable one. The driver stopped her, but just pay half of what the old lady says, lady," he insisted. "I'm going fifty-fifty on the old lady."

Should Have Consulted Bankers

California Lawyer Fines Spanish Queen Made Poor Investments

C. J. Barker, attorney of North Hollywood, California, who has a flair for statistics and history, figures Queen Isabella made a poor investment when she financed Christopher Columbus in his discovery of America.

"She should have consulted her bankers," Barker says. "If she had invested this money at five per cent interest, it would be compounded semi-annually. It today would have reached a total of more than \$4,500,000,000,000. This is 114 times the value of the United States and all its possessions."

"She ought to have consulted her bankers."

China Buys Wheat

Purchases 3,000,000 Bushels From Canada In First Quarter Of Year

Purchases of Canadian wheat by China in the first quarter of the year amounted to 100,000 tons (about 3,300,000 bushels) according to an article by L. M. Congrave, Canadian trade commissioner at Shanghai, in the Commercial Intelligence Journal. This amount, Mr. Congrave states, is larger than expected in the face of a drop in the value of the Australian pound sterling which enables Australia to sell to Chinese millers at rates to 10 per cent below other countries.

Eggs from a 6,000-hen poultry farm in Brandenburg, are taken by auto trucks at regular hours to Berlin, Germany, where they are sold in the streets.

Hero, of Alexandria, experimented with the idea of a steam engine on 120 B.C.

Poland has decided to speed up government construction work.

SIR HUBERT DEMONSTRATES RADIO

Sir Hubert Wilkins in a demonstration aboard the submarine "Nautilus," which is to voyage to the North Pole, at the New York Engineering Co. shipyards, Yonkers, N.Y., used for the first time the radio facilities aboard the undersea craft. The submarine is equipped with a 400-watt, transmitter, licensed to use 20 broadcasting channels between 275 and 17,500 kilocycles.

German Pupils Must Learn French First

Mastery Of Language Takes Longer Than English Says Officials

Despite the great preference shown for English in Germany, the Prussian Ministry of Education has ruled that the schools must start with French, says an item in the New York Times.

The reason is the English language is so easy to learn that it is considered unnecessary, whereas French requires years of drilling. Literature school children have been allowed to choose the foreign language they desired to study first, with the result that, in many provinces of Eastern and Northern Germany, many only English is available in the schools. In Low-Silesia, sixty-six out of sixty-seven school districts start with English, and in Schleswig-Holstein all thirty-five districts start with English, which is particularly easy for the inhabitants of the original home of the Anglo-Saxons.

Increase In Dairying

Dairying is again on the upsurge in Alberta. In January, 1931, an annual report prepared by H. A. Craig, deputy minister of agriculture, and tabled in the provincial legislature by Hon. George Hoodley, reveals creamery butter manufactured in this province showing a 77 per cent increase over the same month of 1930.

Less than half the men who offer to join the British army are physically fit, declares the Secretary of State for War.

FASHIONABLE PYRAMIDS FOR MILADY

Lillian Kenton is shown displaying a beautiful mode in a hostess pyramid of white pan velvet. The flat crepe jacket is lined in turquoise. This was one of the chic outfits seen at the fashion show held for the benefit of the Greenwich Settlement and sponsored by Mrs. Franklin D. Roosevelt, wife of the governor of New York.

Progress In Railroad

Development Has Been Rapid Since Enterprise Launched In Canada

When Dr. Manning's recent reference to the approaching centenary of steam railway enterprise in Canada is a reminder of the progress that has been made in railroad since that July day, in 1826, when the first train was run from Lachine, on the St. Lawrence, to St. John's Quay, the Richelieu—by the assistance of horses. There were about 15 miles of track, four passenger cars, each capable of carrying eight people, 20 freight cars capable of carrying a 10,000-ton load, and an engine that weighed all of five, or six tons, cost less than \$7,500. Today, the big 4-8-4 locomotives on the Canadian National weigh, approximately, 325 tons, and the value of one of these is in the neighborhood of \$100,000. The railway from Lachine to St. John's was incorporated in 1832 and commenced operation in July of 1836. On the same day a survey was begun, with the assistance of 110,000 votes by the Imperial Government, for a railway from Quebec City to St. Andrews, on the Bay of Fundy. This survey encountered difficulties due to the disputed boundary line. Meanwhile, in Upper Canada also, plans were afoot in 1834, two railways were incorporated, the Cobourg and the London Gore. But the first actual built was from Toronto to Bradford, which commenced operation in 1853. Since that time development has been rapid. There are today in Canada about 41,000 miles of railway; the capital invested is over \$1,100,000,000, nearly 100,000 people are employed, and there is a wage bill of \$290,000,000.

Eggs Have Affinity For Fruit Flavours

Will Acquire Odor Even If Stored In Separate Rooms

If your morning egg or eggs have a taste reminiscent of oranges, lemons, grapefruit, or apples, it is all right according to the United States Department of Commerce. The department has discovered that if an egg is stored near an orange, the yolk of the egg has such an affinity for the odor of the orange that it will catch it. This occurs even when the egg and the orange are in separate rooms. The smell of the orange carried off through the air goes right through a door direct to the yolk of the egg and through its shell and everything.

The department found this out when a shipment of eggs and fruit was made to London.

Menace That Is Costly

Buildings In London Being Damaged By Atmospheric Impurities

Atmospheric impurities have cost Britain nearly 150,000,000 in repairs to buildings during the last twenty-five years. This was revealed by Sir Frank Baines, ex-director of the Office of Works, giving evidence on behalf of the London County Council, before the Electricity Commission in opposition to proposed 43,500,000 extensions to Fulham power station on the grounds of pollution. Sir Frank said deposits of sulphuric acid in the atmosphere had decayed Portland stone in Whitehall by one-eighth of an inch in fourteen years, and obliterated the lettering on a war memorial in six weeks.

An Unprofitable Hobby

Business Man Should Not Become Fascinated By Radio

The business man who yields to the fascination of the radio for entertainment is adopting one of the most unprofitable hobbies, according to Dr. D. Lechner Anderson. For those engaged upon sedentary occupations the radio is a snare and a delusion, Dr. Anderson declares. It entices them to cultivate German of indolence which means to produce an adverse effect upon health. It undoubtedly tends to lead to lack of exercise.

"The business man's muscles require exercise," declared Dr. Anderson, "and his lungs must be given more work to do. The appeal of the radio will grow stronger the more he yields to its strenuous. Yielding means weakened health. The loss of health may not be apparent for months, or even years. Its approach will be insidious, but being insidious, will be the more dangerous."

Prepares In Advance

Aberdeen, Scotland, boasts of a well known resident who has erected his own tombstone in the graveyard he has chosen as his last resting place. As he passes it every Sunday on his way to church he scans the letters carved in the granite telling the name and biography of the future occupant of the grave but with the date left blank.

"So your wife is getting absent-minded?" asked the neighbor.

"Must be," grumbled the young chap. "The other day I gave her a sock and she got me a new pair of socks and she came home with a new dress."

Growth Of Radio

Radio Set For Every Ninety-Seven Of The Population Of Canada

The radio continues to grow rapidly in popular favour throughout Canada. Licensed receiving sets at the end of March, 1931, totalled 514,701, an increase of 80,555 over the number registered on March 31, 1930. This means that there is now a radio set for every 19 of the population. The sets are distributed among the provinces and territories of Canada as follows: Ontario, 257,275; Quebec, 94,882; British Columbia, 42,729; Saskatchewan, 33,616; Manitoba, 32,989; Alberta, 23,690; Nova Scotia, 16,530; New Brunswick, 16,530; Prince Edward Island, 1,253; Northwest Territories, 144; Toronto leads the list among cities of the Dominion with 80,342 sets. Montreal is next with 44,959 sets. Vancouver is third with 20,442, and Winnipeg is fourth with 20,365.

Every owner of a radio receiving set in Canada is required to pay a license fee of \$1 to the Canadian government. For this fee certain benefits are secured. The Canadian radio fan has given one branch of this service is to detect and check causes of interference that prevent satisfactory reception. Motor cars with special equipment are maintained by the government in order to find the cause of trouble. When located, experts apply the remedy. The Canadian government has a Director of Radio attached to the Department of Marine.

Insect Dangers

Insect Enemies Are To Be Fought At Every Opportunity

Most men friend on this earth is the bug—but it is necessary to pick your bug with some discrimination. For there are many bad bugs roaming about in the world, and some of them may devour. The United States Department of Agriculture warns us that "insects are enemies to be fought at every opportunity. They are 'enemies' which, if not repulsed, will drive men from the earth." The enemy is not, of course, speaking of the bad bug.

The majority of the bug family are unfriendly. Of the house fly, the mosquito, the bedbug, the silver-winged moth that eats last winter's overcoat, the potato bug, the picnic ant, the termite and all the rest, they are the enemies of the human race and must be slugged, stepped on, poisoned and otherwise ill-treated or they will undo us.

The entomologist sometimes fits us with fear as to what the bad bugs will do to us, but when we remember what the human race has done to the insect, we are inclined to lay aside our apprehensions and to believe that there is no insect whatever that is not beatable when we once get after him. But the friendly bug is our white horse—our strong tower—our oasis in the desert.

German Banks Help Merchants

Germanus Support Has Resulted In Increased Export Trade

The financing of foreign trade is a matter of importance. Yet it is not less important than the production of the goods and the securing of orders, and the Government has earned the gratitude of the business community by recognizing this truth. The rapid development of Germany's export trade before and since the war has been in large measure due to the generous support accorded to her industry by her banks. German banks of all sizes, and again, are prepared to sell goods on terms which the average British merchant does not consider credit for a year or even longer were, and are, accepted by German firms because their bankers have been ready to support them.

Automobiles advertising British goods are touring Central Africa.

"This dressermaker is a fool and an imbecile."

He: "I believe you."

He: "He won't make me a new dress until I pay him."

He: "A charming, sympathetic fellow."—Buen Humor, Madrid.

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot be copied. Look for the Bayer cross, thus:

(Made in Canada)

WORLD HAPPENINGS BRIEFLY TOLD

The engagement of Princess Ileana to Archduke Anton of Bourbon, was announced at Bucharest.

The national council reconvened at Ankara and unanimously elected Mustafa Kemal president of Turkey.

A little girl 11 years old arrived in Toronto, after travelling all the way from Gaidyuka, Ukraine, to be reunited to her father, George Hume.

Canada led all the countries of the world in trade with the United States during the month of March, in respect to both exports and imports.

Direct telephonic communication between Great Britain and Canada, and Great Britain and New Zealand, using the beam wireless system, will shortly be put into effect.

Approximately 12,500,000 acres of land will be sown to wheat in Australia in the coming season, compared with 18,600,000 acres last year, the government stated.

The new Arts Building of the University of Manitoba is now under construction and will cost over \$410,000. It will be built on Manitoba's native tuffaceous limestone.

Mrs. Edward Montagu, who started on a 6,000 mile flight through Russia and Persia, ceased her venture when her plane crashed and burned at Meshed, Persia.

Rt. Hon. J. H. Thomas announced that British representatives would attend the Imperial Conference at Ottawa with co-operation with the Dominions as their aim.

A verdict of accidental death was recorded by the coroner upon the resumption of an inquest into the death of 48 persons in the wreck of the dirigible R-101.

To Detect Intoxication

Chemical Detection Invented By University Professor

A chemical detector of intoxication has been invented by Dr. Rollo N. Harger, of Indiana University. It makes possible an unerring detection of intoxication by taking a sample of the human breath and subjecting it to simple chemical tests. The device may serve police authorities to convict persons of driving motor cars under the influence of the common grape. It is alcohol in the breath the solution changes color from red to white even when the breath has no odor of alcohol.

Canada's Census

Canada's census this year will reveal a population of more than 10,600,000 for the first time in the history of the Dominion. E. A. MacPhail, chief of the Division of Census and Vital Statistics, forecast while in Winnipeg recently.

The Newest Invention

Device For Counting Words Written On Typewriter Has Been Patented

One might think there is nothing left to invent, but according to Popular Science Monthly, a firm at Hartford, Conn., has taken out papers patenting a counting device for a typewriter. By this device a person knows how many words have been written. Counting words, or estimating them, has always been a problem. A good many city editors have told reporters they would take 500 words on a certain story, and the reporters have simply had to guess at it by knowing the number of words he can put on a sheet.

It might be quite a help in checking too much wordiness in editorials. The writer would gaze now and then on that little counting device, and it would warn him to quit, and editorial writers are often in need of such admonition.

The field is still open for such a contraption to be fastened to the jaw of public speakers.

Long Range Forecasts

Weather Forecasts May Possibly Be Given Quarter Century Ahead

The opinion that future weather prophets may be able to forecast droughts and wet spells as much as 25 years ahead was expressed before the American Geophysical Union at Washington, D.C.

A. P. Gorton, of the Scripps Institution of Oceanography of California, said upward and downward trends in rainfall might be detected that number of years in advance by closer study of sunspots and the output of heat from the surface of the ocean.

British Navy Will Visit Kiel

For the first time in 17 years a British naval unit will visit Germany this summer. The admiralty announced it had accepted an invitation from the German Government and that H.M.S. Dorsetshire and H.M.S. Norfolk, would pay an official call at Kiel from July 4 to July 11. The last time such a thing happened was in June, 1914.

Depends On Electricity

California Man Uses It Exclusively For Drying Fruit

One enterprising fruit grower in the fertile Santa Clara Valley of California has replaced "Old Sol" with electricity. Prunes, apricots and walnuts grown on his ranch are dried in two electric dehydrators 24 hours a day, instead of less than half that time previously. The dehydrators produce a uniform output with less work and without the problem of sudden changes in weather.

The prune-apricot dehydrator is long and square with trays that hold about 3,000 pounds of fruit. The walnut drier is a large cylinder with a capacity of 2,000 pounds. In each, the electric heat is evenly distributed by means of fans. The walnuts after being electrically hulled and washed are kept in the drier for a period of from 24 to 70 hours under a temperature of from 90 to 110 degrees.

Good Business For Canada

If Loan Proposal Meets With Anything Like Success

In an editorial on the Canadian Government's conversion project, the London Financial Times, England, says the varying nature of the project to which the offer is applicable prevents any close estimation of the saving likely to be made, but will certainly be several million dollars per annum if the issue is attended with anything like success.

The Financial Times adds that the outcome of the impending operations will also give some indication of the manner in which the public in the Dominion view future prospects, and thus provide a guide for dealing with the balance of the loans concerned.

Central Heating Plant

The Northern Public Service Corporation and the Winnipeg Heating Co., have purchased a site for their new central heating plant, and work will commence soon. The cost of the plant is estimated at \$1,500,000. It will provide employment for 1,000 men.

New Cunard Liner

Seventy-Three Thousand Ton Vessel Being Built In Scotland For Trans-Atlantic Travel

Practically the whole world will take some part or other in the construction of the new 73,000-ton Cunard liner at present being built at the yards of the John Brown Company, Clydebank, Scotland. This line which when finished will be the fastest liner ever constructed for trans-Atlantic travel, is the result of four years' intensive planning on the part of the best marine minds that could be brought together.

For several years before the ship was ordered, intricate tests were carried out in the laboratories of John Brown and Company, for which models—exact replicas of the new Cunard—were constructed. These models were placed in specially-designed tanks and submitted to every condition of sea and wind that might possibly be encountered on the Atlantic Ocean.

When the final model was approved and the plans for the docking facilities completed at Southampton, work was commenced in the same yards in which the world famous "Aquatics" was constructed.

Right across the Clyde from where the new Cunard is being built is the River Cart. It will be necessary to cut a very large part of the bank of this river away as well as deepen it, the launching of such a large vessel is without precedent; launching preparations are at present demanding a great deal of care in the working out of the problems of commencing the giant vessel to the water.

This recalls to mind the great care and attention which was paid to the launching of the "Aquatics" when she was launched on the Clyde, and at that event was found expedient to make a large cut in the bank of the river to allow for the ship to be launched.

The household equipment for the new "Queen of the Seas" will include 800,000 pieces of silver, 2,000,000 pieces of china, pottery and glass, and an incredible quantity of linen and furnishings of every conceivable kind. Indications at present point to a launching early in 1932—considerably in advance of the date originally set last year when the order was given to John Brown and Company.

The first opportunity that the general public will have to view the construction of this new Cunard will be when the yards of John Brown and Company are opened for public inspection during Glasgow Week, and preparations are being made for crowds of visitors to be taken care of who are anxious to get a glimpse of this ocean giant in the making.

Reduction of railway fares in the Philippines is forcing bus lines to merge.

SUNDAY SCHOOL LESSON MAY 17

JESUS ENTERS JERUSALEM AS KING

Golden Text: "He is Lord of lords and King of kings." Revelation 17: 14.
Lesson: Luke 19: 28 to 30: 47.
Devotional Reading: Psalm 24.

Explanations and Comments

Preparations For Christ's Triumphant Entry, 19: 28-35.—And when he had thus spoken (his account) immediately the giving of the "Parable of the Pounds," Jesus went before His disciples on their way to Jerusalem. "The Jerusalem road is no Aspidon way lined with the tombs of dead pagans; it is no macadam road running through the hills and over the moorland to the city or the sea. It is rather the direction of a desert, a purpose pursued, a quest adopted and a conquest won. It reveals the Christ of the sacrificial purpose."

The triumphal entry was deliberately planned. It was Jesus' last appeal to the people to accept Him as the kind of King He was. He would exhaust the possibilities of the situation, though He could not have expected to turn the people's mind away from the king they wanted, to an earthly rather than a spiritual king.

In the neighborhood of Bethany and Bethphage, on the Mount of Olives, He sent two of His disciples to a nearby village to secure for Him two donkeys. They had to go, they would find them there. In case they were not, they had to take a "Lion's head" of him.

These words may have been the password which Jesus had arranged with the owner of the colts. From John 12: 1 we know that he had stopped for at least a night at Bethany, when Jesus had been to the house of such an arrangement. An ordinary beast of burden would have been unsuitable for a distinguished person, whereas the fact that had never carried any one met the requirements. It all happened in just that way—the owner and the answer of the disciples were given, and the latter returned with the colts.

By choosing an ass to ride upon, Jesus plainly showed the people that He was not to be thought of as a military leader, for the horse was used in warfare, while the ass was the fitting animal for the Prince of Peace. The people threw garments on the colts for Jesus to sit upon and to make a large cut in the bank of the river to allow for the ship to be launched.

He was not to be thought of as a military leader, for the horse was used in warfare, while the ass was the fitting animal for the Prince of Peace. The people threw garments on the colts for Jesus to sit upon and to make a large cut in the bank of the river to allow for the ship to be launched.

Canadians Honored

Scientific Men Elected As Fellows Of Royal Society Of Canada

Ten Canadians distinguished in scientific and academic fields have been elected as Fellows of the Royal Society of Canada. The recipients of this honor, as announced are:

Section 1—Rev. G. M. Maudslayi, director of Montreal classical school.

Section 2—Dr. Harold Hibbert, McGill University; Dr. Joseph Pearce, Dominion astronomical observatory, Victoria, B.C.; T. R. S. Robergh, University of Toronto.

Section 3—Dr. W. M. Baker, Queen's University; Dr. William E. Cockfield, geological survey, Vancouver; Dr. F. S. Warren, University of Alberta.

Section 4—Professor M. B. Baker, University of Toronto; H. T. Gassow, Dominion botanist, experimental farm, Ottawa; Dr. Pierre Masson, University of Montreal.

The next meeting of the society will be held in Toronto, where the members will be the guests of the University of Toronto.

Dean Inge has given the following motto for London pedestrians: "If you don't want a tombstone, look out!"

Conceded men are unsafe automobile drivers, is the conclusion of an Illinois state criminologist.

CHAPTER XVII.—Continued

On the day when the boat dropped anchor in Port Antonio, Nick was with the dave. On the dave's side his port-hole had driven him out of bed, in order not to miss a moment of the enchanted scene. Mountains, purple and hazy in the background, palm-covered hillsides dotted with red-roofed huts or houses—hedges of flowering hibiscus—sapphire skies, and water as blue as turquoise. The tropics!

Early enough it was, boys with shining black bodies were swimming about in the water, as much at home here as the fishes that kept their company. On shore were men, men, carrying huge baskets on their heads or hung with gaily colored beads to sell to the tourists who would soon come.

The warm air—the rich coloring of these landscapes—its very difference from the ice-land of Greenland—he had left behind, caught Nick's imagination, and held it spell-bound. If Gay were only with him! Sudden regret flooded through him—regret that he could not see it—that she was not here to share his joy in these strange, new sights. Share it! He must with someone, or—

"It's fairly radiant, isn't it?" said Angela, her shoulder brushing his as she joined him at the rail.

She had approached so quietly that Nick heard no footsteps, but he turned, throwing her a glance of undisguised attraction—not rapture at her own charm, which was indeed great, but at the scene behind them, and at "Life," which had given him this chance to drink of it.

"It's a dream of a dream," he answered. "I feel inclined to pinch myself, just to be sure that I am 'I,' I envy you the weeks you will have here. Angela!" (It had become "Angela" and "Angela" during those days of intimacy on the boat.) "Kington, I believe, is more of a city. However, I've got today to revel in it."

"Will you let me revel with you?" "That will be bully, if your friends will let you off."

She laughed softly, not thinking it necessary to explain that her friends were wholly innocent of her arrival.

"They'll have to be. We'll go for a drive. Nick—nir one of those ridiculous darkeys to take us you know. It's not as new to me as it is to you. I came here with Mr. Halliday five years ago. Shall we wait for breakfast on the boat, or go ashore and get it at the hotel?"

CORNS LIFT OFF

Pain Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—easy to use. It's just how PUTNAM'S Corn Extractor works. You can buy PUTNAM'S Corn Extractor from any drugist for 50c.

PUTNAM'S

and casting a veritable halo about Gay's head.

"James Halliday breathed deeply at the words.

"Now," he responded, "they will never forget it. I wonder if it isn't memories such as this, that keep us from falling when the ways seem hard. I can remember—"

He broke off suddenly, as if his thoughts had betrayed him into an emotion. And in that moment his the Martha turned and saw him. She slipped from Gay's encircling arm, and ran to him.

"I love you best," she whispered, as he caught her up. "I love you best of anyone."

It was the next day that Martha forced him into a decision he had long been considering. She was watching him use his typewriter, a pursuit of which she never tired; and having become accustomed to her presence it did not disturb him, because she rarely spoke. But this morning as he paused, hearing an elusive word, she said: "Sony and little Nick—they have a dinky."

"He sends them postcards, an—"

"letters, and he's away!"

Haliday lifted the child onto his knee and pushed his machine aside, as if this interruption were more important than his work.

"I want one," went on the little girl sobriety. "Couldn't you be my daddy?"

He held her a little closer. "Are you sure," he questioned with paternal eagerness, "are you quite sure I'd make a satisfactory one?"

"You're my best favourite," answered little Martha.

She reached up a small, plump hand to touch his cheek. Haliday caught and kissed it.

"Then," he said huskily, "that settles it. I believe every boy's best favourite." But, Martha, it seemed had more to say.

"They have a mother, too," she hesitated.

"The new-made father winced. "I know, but—wouldn't I do for both?"

"I'd like Mrs. Hastings for my mother. Please, Daddy."

The new name dropped sweetly and naturally from the child's lips, and Haliday, bending, kissed her bright head in passionate gratitude.

"I'd like her," she persisted. Had she felt sure the would have been a dark flush mount in the face above her.

"Do you know what a family is, dear little girl?" he questioned gently.

"Are we one?" (To Be Continued.)

Observed Ancient Past Day Mills were silent in New Hampshire, April 23, and stores were closed for the Granite State was observing fast day. A holiday that has come down from earliest colonial times.

The day originally was set aside each year by the Puritans as one of fasting and prayer in which to offer thanks for surviving the bitter New England winter and in which to pray for the success of crops in the forthcoming season.

Seventeen thousand teachers now instruct London's 700,000 pupils.

The outer skin of the body is almost germ-proof.

When Children Fret THERE are times when a child is too fretful or feverish to be soothed by a mother's arms. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever cold tongues tell of constipation; whenever here's the sign of sluggishness, Castoria has the right sign; children love to take it. Buy the genuine—watch the Fletcher's signature on wrapper.

Fletcher's CASTORIA

Would Extend Silver Coinage One Dollar and Two Dollar Pieces Suggested By McGehee

Extension of silver coinage to include, in Canada, one-dollar and two-dollar pieces, and increase of silver content in subsidiary coins, was suggested by R. L. Hon. Arthur McGehee, former Minister of Finance, in the House of Commons, April 10, 1929. The means of aiding in the cure of the present economic depression. At the annual dinner of the Daily Newspaper Publishers of Canada, held in Toronto, he made the drastic decline in value of silver as a normally contributory cause to world-wide depression.

Since measure of value and sole medium of exchange for half the world, silver had dropped precipitately to little more than 40 per cent. its value five years ago. Mr. McGehee pointed out. The result, he explained, was that the purchasing power of Asia, South America and Mexico—silver medium areas, has been cut down, and the cost of production in these lands has been increasing. He pointed out that the products underlying those areas, Britain and Europe is increasing.

By increasing the percentage of silver in subsidiary coins, larger demand could be issued without decreasing so great the possibility of hoarding.

He suggested that the coinage of one-dollar and two-dollar pieces, instead of the present currency, would be a means of extending the use of silver and pressing upward its value.

He suggested that the coinage of one-dollar and two-dollar pieces, instead of the present currency, would be a means of extending the use of silver and pressing upward its value.

Subsidies To Provinces Coal Movement Heavy

Domestic Government Paid Out \$19,052,731 For Fiscal Year Ending March 31.

A total of \$19,052,731 was paid for the fiscal year which ended on March 31 last, to the nine provinces of Canada by the Dominion government in the way of regular (or special) subsidy.

This amount was distributed as follows: Ontario, \$2,942,611; Quebec, \$2,256,419; Nova Scotia, \$1,038,841; New Brunswick, \$1,268,748; Manitoba, \$6,478,618; British Columbia, \$738,816; Prince Edward Island, \$500,901; Alberta, \$1,670,435; Saskatchewan, \$1,638,295.

The grant to Manitoba included \$422,842 as special payment under the natural resources agreement.

That to the Maritime provinces included the special grants recommended by the Duncan commission and approved by parliament.

Coal Movement Heavy Increase Is Shown On Canadian National Lines Over Previous Year.

A comparison of commercial coal loadings along the lines of the Canadian National Railways, April 1, 1931, and the same month of 1930, indicates a slight increase.

This year may be attributed to the more frequent shipments from Edison and Drumheller, and the commencement of activities in the Monogram mine at Estevan.

Grain loadings on the C.N.R. during April showed large increase against 1930. Eastbound loadings this year totalled 5,534 cars against 2,309 cars in 1930.

The entire month 4,498 cars were delivered at the Lake Head as compared to 1,299 in April last year.

Eastbound loadings totalled 1,967 as against 608 in the corresponding year, and 1,805 cars were delivered in Vancouver as compared to 884 in 1930.

What's a Name?

Plenty.

When it's McCarty.

IMPORTANT!

Have you seen the new McCarty Coal and Wood Ranges? New, different, beautiful, efficient, they represent the finest value ever offered Canadian women.

The welfare of wild fowl, such as grouse and quail, is closely linked with that of rabbits, since rabbits are a main food supply to them.

GLENADA JUNIOR U.F.A.

The May 1st meeting of the Glenada Junior U.F.A. was attended by twenty members and a number of visitors. An exciting ball game before the meeting, umpired by supervisor W. J. Byler, was a complete success. Vice-president Wesley Byler opened the meeting with community singing. It was decided to hold a dance on May 29 to help to raise funds for two delegates to the conference in Edgmont. After the meeting the boys' program committee organized for the remainder of the evening.

EXCEL NEWS

It is about 85 per cent sown in this district, and will probably be completed this week-end seeding of oats commenced. Wheat which was above ground, was touched with frost last week but appears to be doing well now. No damage is reported as yet from cut worms.

Excel U.F.A. met on Saturday night, May 9, in Excel school. A game of soft ball was played before the meeting, which was well attended. The next meeting will be held on June 13. Everybody is asked to attend. A game of ball will be played before the meeting.

Mr. and Mrs. J. K. Sutherland of Hanna spent the weekend with Mr. and Mrs. C. A. Bishop.

Miss Eileen Bishop who has been ill for some days, is recovering, but will be out of school for several days yet.

Mr. and Mrs. E. G. Lamb and children of Youngstown spent the week-end visiting at the home of Mrs. Lamb's parents, Mr. and Mrs. Thos. Stein.

AN OPPORTUNITY TO HOLDERS OF EARLY MATURING CANADIAN GOVERNMENT BONDS TO EXTEND THE TERM OF THEIR INVESTMENT IN THE PREMIER SECURITY IN CANADA

GOVERNMENT OF THE DOMINION OF CANADA 1931 CONVERSION LOAN

The Minister of Finance of the Dominion of Canada offers to holders of the undernoted Dominion issues the privilege of exchanging their bonds into longer dated issues, in the following terms and under the following conditions:

This offer affords to holders of bonds eligible for conversion, the same interest payment and tax-free privileges, for the life of and as contained in the present bonds, and the opportunity of extending the term of the investment at 4 1/2% per annum.

WAR LOAN 5% BONDS MATURING 1st OCTOBER, 1931—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1956, bearing interest from 1st April, 1931. The first coupon will be for six months' tax-free interest at the rate of 5% per annum payable 1st October, 1931; the second coupon will be for seven months' interest at the rate of 4 1/2% per annum payable 1st May, 1932; thereafter to maturity interest will be payable half-yearly at 4 1/2% per annum.

RENEWAL LOAN 5 1/2% BONDS MATURING 1st NOVEMBER, 1932—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1957, bearing 4 1/2% interest payable half-yearly from 1st May, 1931. There will also be attached to these bonds three adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932, for additional interest at the rate of 1% per annum.

VICTORY LOAN 5 1/2% BONDS MATURING 1st NOVEMBER, 1933—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1958, bearing 4 1/2% interest payable half-yearly from 1st May, 1931. The first five interest coupons, being those to and including 1st November, 1933, will be tax-free. There will also be attached to these bonds five tax-free adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932 and 1933, for additional interest at the rate of 1% per annum.

VICTORY LOAN 5 1/2% BONDS MATURING 1st NOVEMBER, 1934—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1959, bearing 4 1/2% interest payable half-yearly from 1st May, 1931. There will also be attached to these bonds seven adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932, 1933 and 1934, for additional interest at the rate of 1% per annum.

Conversion applications in the terms of the foregoing are invited to a total of \$250,000,000. The Minister of Finance reserves, however, the right to increase or decrease this amount at his discretion.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by recognized Canadian Bond Dealers and Stock Brokers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists to the foregoing will open on 11th May, 1931, and will close on or before 23rd May, 1931, at the discretion of the Minister of Finance.
